

TABLE OF CONTENTS

	<u>Page</u>
ACKNOWLEDGMENTS	ii
EXECUTIVE SUMMARY	iii
LIST OF FIGURES	v
LIST OF TABLES	vi
I. INTRODUCTION	1
A. Coastal "Red Tides" versus Toxic Estuarine Dinoflagellates	1
B. A Newly Discovered Toxic Dinoflagellate in the Pamlico Estuary	2
C. Objectives of This Research	5
II. PROJECT PROCEDURES	6
A. Formal Speciation and Characterization of the Life Cycle	6
B. Field Monitoring Effort	6
C. Bioassays to Screen for Toxic Activity	9
D. Effects of Toxin Exposure on Fish Kin and Gill Tissue	10
E. Optimal Physical Conditions for Toxic Activity	10
F. Response to Inorganic Nitrogen and Phosphorus Enrichments	13
G. Statistical Analyses	14
H. Interactions With Natural Ciliate and Rotifer Predators	14
III. DATA SUMMARY	15
A. Formal Speciation and Description of the Complex Life Cycle	15
B. Occurrence and Toxic Activity of <i>Pfiesteria piscimorte</i> (nov.gen., nov.sp.)	18
C. Affected Species of Finfish and Shellfish	24
D. Acute and Chronic Damage to Fish Skin and Gill Tissues	27
E. Dinoflagellate Response to Salinity, Light and Nutrient Gradients	27
F. Exploration of Potential Agents of Bio-Control	35
IV. DISCUSSION / CONCLUSIONS	35
V. RECOMMENDATIONS	40
VI. REFERENCES	44
APPENDIX: GLOSSARY OF ABBREVIATIONS AND TERMS	52
